Influent Flow and Loading

JONES ISLAND

- 1. Monthly Average Flows and BOD Loadings
- 1.1 Verify the following monthly flows and BOD loadings to your facility.

Influent No. 701	Influent Monthly Average Flow, MGD	X	Influent Monthly Average BOD Concentration mg/L	X	8.34	=	Influent Monthly Average BOD Loading, lbs/day
January	118.0000	Х	218	Х	8.34	=	214,633
February	77.9655	Х	279	Х	8.34	=	181,617
March	138.5161	Х	180	Х	8.34	=	208,127
April	134.3000	Х	202	Х	8.34	=	226,327
May	132.5484	Х	191	Χ	8.34	=	211,677
June	131.3667	Х	203	Х	8.34	II	222,845
July	93.8065	Х	210	Х	8.34	II	163,928
August	88.8710	Х	225	Х	8.34	II	167,053
September	66.3333	Х	227	Х	8.34	=	125,581
October	59.7419	Х	269	Х	8.34	=	133,884
November	93.1000	Х	234	Х	8.34	=	181,690
December	67.4516	Х	282	Χ	8.34	=	158,420

- 2. Maximum Monthly Design Flow and Design BOD Loading
- 2.1 Verify the design flow and loading for your facility.

Design	Design Factor	Х	%	=	% of Design
Max Month Design Flow, MGD	160	Х	90	=	144
		Х	100	=	160
Design BOD, lbs/day	388000	Х	90	=	349200
		Х	100	=	388000

2.2 Verify the number of times the flow and BOD exceeded 90% or 100% of design, points earned, and score:

	of	flow was greater	Number of times flow was greater	BOD was greater	Number of times BOD was greater
_	Influent		than 100% of		than 100% of design

Milwaukee Metro Sew Dist Combined Last Updated: Reporting For: 4/30/2025 2024 3. Flow Meter 3.1 Was the influent flow meter calibrated in the last year? Enter last calibration date (MM/DD/YYYY) Yes 2024-12-02 o No If No, please explain: Jones Island influent flow meters were calibrated with the schedule below. High Level influent meter: 3/11/2024, 5/17/2024, 10/31/2024 Low Level influent meter: 5/16/2024, 10/31/2024 Inline Storage System meters: 3/11/2024, 5/17/2024, 12/2/2024 Diversion meter: 3/4/2024, 5/17/2024, 6/20/2024, 10/31/2024 4. Sewer Use Ordinance 4.1 Did your community have a sewer use ordinance that limited or prohibited the discharge of excessive conventional pollutants ((C)BOD, SS, or pH) or toxic substances to the sewer from industries, commercial users, hauled waste, or residences? Yes O No If No, please explain: 4.2 Was it necessary to enforce the ordinance? Yes O No If Yes, please explain: Various violations occurred. The District responds to violations according to the Enforcement Response Plan. The semi-annual and annual Pretreatment Program reports summarize the violations and the MMSD response. 5. Septage Receiving 5.1 Did you have requests to receive septage at your facility? Septic Tanks Holding Tanks **Grease Traps** o Yes o Yes Yes No No No 5.2 Did you receive septage at your facility? If yes, indicate volume in gallons. Septic Tanks o Yes gallons No Holding Tanks o Yes gallons No **Grease Traps** o Yes gallons No 5.2.1 If yes to any of the above, please explain if plant performance is affected when receiving any of these wastes.

6. Pretreatment

6.1 Did your facility experience operational problems, permit violations, biosolids quality concerns, or hazardous situations in the sewer system or treatment plant that were attributable to commercial or industrial discharges in the last year?

Milwaukee Metro Sew Dist Combined

Last Updated: Reporting For: 4/30/2025 **2024**

o Yes

No

If yes, describe the situation and your community's response.

6.2 Did your facility accept hauled industrial wastes, landfill leachate, etc.?

o Yes

No

If yes, describe the types of wastes received and any procedures or other restrictions that were in place to protect the facility from the discharge of hauled industrial wastes.

Effluent Quality and Plant Performance (BOD/CBOD)

- 1. Effluent (C)BOD Results
- 1.1 Verify the following monthly average effluent values, exceedances, and points for BOD or **CBOD**

Outfall No. 002	Monthly Average	90% of Permit Limit	Effluent Monthly Average (mg/L)	Months of Discharge	Permit Limit Exceedance	90% Permit Limit	
002	Limit (mg/L)	> 10 (mg/L)	Average (mg/L)	with a Limit	Lxceedance	Exceedance	
January	30	27	8	1	0	0	
February	30	27	8	1	0	0	
March	30	27	10	1	0	0	
April	30	27	10	1	0	0	
May	30	27	12	1	0	0	
June	30	27	7	1	0	0	
July	30	27	5	1	0	0	
August	30	27	7	1	0	0	
September	30	27	5	1	0	0	
October	30	27	5	1	0	0	
November	30	27	9	1	0	0	
December	30	27	9	1	0	0	
		* Eq	uals limit if limit is	<= 10			
Months of d	ischarge/yr			12			
Points per e	ach exceedanc	7	3				
Exceedance	S	0	0				
Points	Points 0						
Total numb	per of points	-				0	

NOTE: For systems that discharge intermittently to state waters, the points per monthly exceedance for this section shall be based upon a multiplication factor of 12 months divided by the number of months of discharge. Example: For a wastewater facility discharging only 6 months of the year, the multiplication factor is 12/6 = 2.0

1.2 If any violations occurred, what action was taken to regain compliance?

_						
7	FΙ	$\cap W$	Meter	· Cal	ihra	ation

2.1 Was the effluent flow meter calibrated in the last year?

Enter last calibration date (MM/DD/YYYY) 2024-07-03

O No

Yes

If No, please explain:

SE #1 6/18/2024, SE #2 7/3/2024

3. Treatment Problems

3.1 What problems, if any, were experienced over the last year that threatened treatment?

None

- 4. Other Monitoring and Limits
- 4.1 At any time in the past year was there an exceedance of a permit limit for any other pollutants such as chlorides, pH, residual chlorine, fecal coliform, or metals?
- o Yes
- No

Milwaukee Metro Sew Dist Combined

If Yes, please explain:
4.2 At any time in the past year was there a failure of an effluent acute or chronic whole effluent toxicity (WET) test? • Yes
• No
If Yes, please explain:
4.3 If the biomonitoring (WET) test did not pass, were steps taken to identify and/or reduce source(s) of toxicity?
o Yes
○ No
● N/A

Operator Certification and Education

- 1. Operator-In-Charge
- 1.1 Did you have a designated operator-in-charge during the report year?
- Yes (0 points)
- O No (20 points)

Name:

BRETT P KELLY

Certification No:

34528

- 2. Certification Requirements
- 2.1 In accordance with Chapter NR 114.56 and 114.57, Wisconsin Administrative Code, what level and subclass(es) were required for the operator-in-charge (OIC) to operate the wastewater treatment plant and what level and subclass(es) were held by the operator-in-charge?

Sub	SubClass Description	WWTP		OIC	
Class		Advanced	OIT	Basic	Advanced
A1	Suspended Growth Processes	X			Х
A2	Attached Growth Processes				
А3	Recirculating Media Filters				
A4	Ponds, Lagoons and Natural		Х		
A5	Anaerobic Treatment Of Liquid				
В	Solids Separation	X			X
С	Biological Solids/Sludges	Χ			X
Р	Total Phosphorus	X			X
N	Total Nitrogen				
D	Disinfection	Х			X
L	Laboratory				
U	Unique Treatment Systems				
SS	Sanitary Sewage Collection	Х	NA	NA	NA

2.2 Was the operator-in-charge certified at the appropriate level and subclass(es) to operate this plant? (Note: Certification in subclass SS is required 5 years after permit reissuance.)

- Yes (0 points)
- No (20 points)
- 2.3 For wastewater treatment facilities with a registered or certified laboratory, is at least one operator that works in the laboratory certified at the basic level in the laboratory (L) subclass?
- Yes
- O N/A Wastewater treatment facility does not have a registered or certified laboratory
- 2.4 For wastewater treatment facilities that own and operate a sanitary sewage collection system, has at least one operator been designated the OIC for sanitary sewage collection system and certified at the basic level in the sanitary sewage collection system (SS) subclass?
- Yes
- O No
- O N/A Owner of the Wastewater treatment facility does not own and operate a sanitary sewage collection system
- 3. Succession Planning
- 3.1 In the event of the loss of your designated operator-in-charge, did you have a contingency plan to ensure the continued proper operation and maintenance of the plant that includes one or more of the following options (check all that apply)?
- ☑ One or more additional certified operators on staff

0

Milwaukee Metro Sew Dist Combined	4/30/2025	2024	For
 □ An arrangement with another certified operator □ An arrangement with another community with a certified operator □ An operator on staff who has an operator-in-training certificate for your be certified within one year □ A consultant to serve as your certified operator □ None of the above (20 points) If "None of the above" is selected, please explain: 	plant and is exp		0
 4. Continuing Education Credits 4.1 If you had a designated operator-in-charge, was the operator-in-charge Education Credits at the following rates? OIT and Basic Certification: Averaging 6 or more CECs per year. Averaging less than 6 CECs per year. Advanced Certification: Averaging 8 or more CECs per year. O Averaging less than 8 CECs per year. 	e earning Contin	nuing

\$ 0.00

3.2.6 Ending Balance as of December 31st for CMAR Reporting Year

16,576,775.00

All Sources: This ending balance should include all Equipment Replacement Funds whether held in a bank account(s), certificate(s) of deposit, etc.

3.2.6.1 Indicate adjustments, equipment purchases, and/or major repairs from 3.2.5 above.

3.3 What amount should be in your Replacement Fund?

16,424,637.00

Please note: If you had a CWFP loan, this amount was originally based on the Financial Assistance Agreement (FAA) and should be regularly updated as needed. Further calculation instructions and an example can be found by clicking the SectionInstructions link under Info header in the left-side menu.

- 3.3.1 Is the December 31 Ending Balance in your Replacement Fund above, (#3.2.6) equal to, or greater than the amount that should be in it (#3.3)?
- Yes

o No

If No, please explain.

- 4. Future Planning
- 4.1 During the next ten years, will you be involved in formal planning for upgrading, rehabilitating, or new construction of your treatment facility or collection system?
- Yes If Yes, please provide major project information, if not already listed below.
- O No

Project #	Project Description		Approximate Construction Year
	South Shore Water Reclamation Facility: See South Shore CMAR, Financial Management, Item 4.1	\$0	0
2	Jones Island Water Reclamation Facility and Pipelines: 55 Projects	\$346,760,100	2034
3	Conveyance Projects: 41 Projects	\$268,286,500	2034

5. Financial Management General Comments

Response #4 above represents planned spending for Conveyance (Collection System) and Water Reclamation Facility (Jones Island, Pipelines, and South Shore) projects for the District's ten-year planning cycle beginning in 2025. Jones Island and Pipeline project counts and costs have been combined. Additional projects, i.e. Watercourse Improvement and other projects, as well as debt service during the same ten year period will total \$2.2 billion. For a complete listing of all projects and expenditures planned for the period 2025 to 2034, refer to the MMSD 2025 Capital Budget.

6.3 Has an Energy Study been performed for your pump/lift stations?

o No

- 10	25

Year:

2018

By Whom:

WE Energies

Describe and Comment:

Milwaukee Metro Sew Dist Combined

Last Updated: Reporting For: 4/30/2025 **2024**

A level 1 energy assessment was done in 2018 for the Port Washington Pumping Station by WE Energies. The assessment delivered a report that outlined opportunities for reducing energy. Project M03109, Energy Plan for MMSD Facilities, includes some high level evaluation of pumping stations and was completed in 2024 by Greeley & Hansen.

6.4 Future Energy Related Equipment

6.4.1 What energy efficient equipment or practices do you have planned for the future for your pump/lift stations?

From 2021 through 2024 the District evaluated the various sites for opportunities to improve our energy efficiency and renewable energy profile through the M03109 Energy Plan, in addition to evaluating energy efficiency during rehabilitation projects. Improved power monitoring, controls, and the installation of energy efficient devices such as VFDs continue to be practiced by the District.

9.1 Has an Energy Study	been performed	for your treatment	facility?
-------------------------	----------------	--------------------	-----------

o No

Yes

Year:

2017

By Whom:

University of Wisconsin - Milwaukee Industrial Assessment Center

Describe and Comment:

Assessment covered equipment drives, lighting, and lubricant use throughout the entire facility.

☑ Part of the facility

Year:

2020

By Whom:

Short Elliot Hendrickson and Poyry (2015), Brabazon and Focus on Energy (2020)

Describe and Comment:

MACT assessment was completed of the boilers in 2015. High pressure air compressor study was completed in 2020. Many other processes throughout the facility have been assessed and are monitored for efficiency internally.

Sanitary Sewer Collection Systems
 Capacity, Management, Operation, and Maintenance (CMOM) Program Do you have a CMOM program that is being implemented? Yes
o No
If No, explain:
1.2 Do you have a CMOM program that contains all the applicable components and items
according to Wisc. Adm Code NR 210.23 (4)?
• Yes
o No (30 points)
o N/A
If No or N/A, explain:
1.3 Does your CMOM program contain the following components and items? (check the components and items that apply)☒ Goals [NR 210.23 (4)(a)]
Describe the major goals you had for your collection system last year:
The MMSD CMOM goals related to the conveyance and storage system as presented in the CMOM Program Annual Self-Audit for 2023 (2024 Self-Audit will be completed after the 2024 CMAR scores are received, as this is a performance metric) are: 1. Continue the support of the CMOM Program within the District organizational structure. 2. Communicate the goals and objectives of the CMOM Program to internal and external stakeholders, monitor the CMOM Program, and institute program modifications. 3. Continue to maintain adequate financial planning. 4. Continue to comply with regulatory requirements. 5. Continue to support and monitor the regional CMOM program. 6. Continue to maintain a safe work environment and facilities and also sustain a competent workforce. 7. Establish CMOM program elements specific to minimizing the number and volume of CSOs. 8. Continue to implement and support the Wet Weather Peak Flow Management Program. 9. Where possible, establish additional practices to prevent sanitary sewer overflows (SSOs), maintain or improve system performance, and avoid preventable failures. 10. Continue to establish and document level of protection, design, and performance standards for new conveyance assets constructed in the District service area, and consider documented and predicted changes in climate. 11. Minimize the cost of conveyance asset ownership while maintaining necessary stewardship of assets and achieving defined protection levels. 12. Enhance District level of knowledge and understanding of wet weather flows and system response to precipitation and other factors. 13. Promptly and accurately respond to customer inquiries.
Did you accomplish them?
• Yes
o No
If No, explain:

☑ Organization [NR 210.23 (4) (b)]

Does this chapter of your CMOM include:

- ☐ Organizational structure and positions (eg. organizational chart and position descriptions)
- ☑ Internal and external lines of communication responsibilities

Milwaukee Metro Sew Dist Combined

☑ Person(s) responsible for reporting overflow events to the department and the public □ Legal Authority [NR 210.23 (4) (c)] What is the legally binding document that regulates the use of your sewer system? MMSD Rules If you have a Sewer Use Ordinance or other similar document, when was it last reviewed and revised? (MM/DD/YYYY) 2020-02-24 Does your sewer use ordinance or other legally binding document address the following: ☑ Private property inflow and infiltration ☑ New sewer and building sewer design, construction, installation, testing and inspection Rehabilitated sewer and lift station installation, testing and inspection Sewage flows satellite system and large private users are monitored and controlled, as necessary □ Fat, oil and grease control ☑ Enforcement procedures for sewer use non-compliance ☑ Operation and Maintenance [NR 210.23 (4) (d)] Does your operation and maintenance program and equipment include the following: ☑ Equipment and replacement part inventories ☐ Up-to-date sewer system map A management system (computer database and/or file system) for collection system information for O&M activities, investigation and rehabilitation ☑ A description of routine operation and maintenance activities (see question 2 below) ☐ Capacity assessment program ☑ Basement back assessment and correction □ Regular O&M training ☑ Design and Performance Provisions [NR 210.23 (4) (e)] 0 What standards and procedures are established for the design, construction, and inspection of the sewer collection system, including building sewers and interceptor sewers on private property? ☑ State Plumbing Code, DNR NR 110 Standards and/or local Municipal Code Requirements □ Construction, Inspection, and Testing ☐ Others: ☑ Overflow Emergency Response Plan [NR 210.23 (4) (f)] Does your emergency response capability include: ☑ Responsible personnel communication procedures ☐ Response order, timing and clean-up ☑ Public notification protocols ☑ Emergency operation protocols and implementation procedures ☑ Annual Self-Auditing of your CMOM Program [NR 210.23 (5)] ✓ Special Studies Last Year (check only those that apply): ☐ Infiltration/Inflow (I/I) Analysis ☐ Sewer System Evaluation Survey (SSES) ☐ Sewer Evaluation and Capacity Managment Plan (SECAP) ☐ Lift Station Evaluation Report ○ Others: MIS Renewal and Infiltration Reduction Strategy Operation and Maintenance

4. Overflows

LIST OF SANITARY SEWER (SSO) AND TREATMENT FACILITY (TFO) OVERFLOWS REPORTED **				
Date	Location	Cause	Estimated Volume	
4/4/2024 8:10:00 PM		Rain, Snowmelt, Flooding, Other causes	357,000,000	
 3/26/2024 12:34:00 AM - 3/26/2024 12:40:00 AM	700 E. Jones St., Milwaukee, WI 53207	Powerout	60,000	

^{**} If there were any SSOs or TFOs that are not listed above, please contact the DNR and stop work on this section until corrected.

What actions were taken, or are underway, to reduce or eliminate SSO or TFO occurences in the future?

The District and Veolia Water Milwaukee will continue to operate the conveyance system, storage system, and the water reclamation facilities in a manner to prevent separate sewer overflows and to maximum the capture of combined sewer overflows. The District's Wet Weather Peak Flow Management Program evaluates infiltration and inflow in our service area to identify areas to target for improvements. To further reduce the risk of basement backups and separate sewer overflows, the District has funded \$45.3 M of infiltration and inflow reduction projects throughout our service area over the last fourteen years. In 2020 the Private Property Inflow and Infiltration Reduction Program was made a permanent component of the annual budget. The District has progressed on projects aimed to reduce or eliminate separate sewer overflows. Improvement projects have begun and are either in design or construction. Construction of the Roosevelt Drive improvements project began in 2023 and will permanently abandon the separate sewer outfall at W Roosevelt Drive and N 35th Street. The Mill Road Relief project will reduce the frequency and volume of SSOs from two locations: from N River Road & W Green Tree Road and from N Broadmoor Road. Construction for the Mill Road Relief project is scheduled to begin in 2027. Construction of the Oklahoma Avenue MIS Capacity Improvements is expected to start in 2025 and will permanently abandon an outfall in W Oklahoma Avenue at S 74th Street. Work began in 2024 to permanently abandon or remove nine separate sewer outfalls.

- 5. Infiltration / Inflow (I/I)
- 5.1 Was infiltration/inflow (I/I) significant in your community last year?
- Yes
- O No

If Yes, please describe:

Yes; Infiltration and inflow (I/I) in satellite municipal collection systems is the primary contributor of peak flows from the separate sewer area of the MMSD conveyance system and is one of the primary causes of separate sewer overflows from the MMSD system.

- 5.2 Has infiltration/inflow and resultant high flows affected performance or created problems in your collection system, lift stations, or treatment plant at any time in the past year? o Yes
- No

If Yes, please describe:

5.3 Explain any infiltration/inflow (I/I) changes this year from previous years:

MMSD believes that I/I has been reduced over the past year. Twenty-four of the twenty-eight member municipalities have PPI/I reduction projects completed or in progress in the first 15 years of the PPI/I Program. Many of the municipalities also completed public sector I/I reduction projects. MMSD has adopted peak flow performance standards in its Chapter 3 revisions which require tributary municipalities to reduce I/I. As of December 31, 2024, there are 37 metersheds in nine municipalities with a non-compliant status. In 2024, analyses were performed on 39 metershed areas. Seven metersheds were found to be non-compliant with section 3.201 based on the most recent metershed flow evaluation. Three municipalities have been notified of the non-compliant metershed areas. Work plans for these areas have been requested and are expected in 2025. Municipalities with non-compliant metersheds must submit a report to MMSD every year detailing progress and future plans to combat I/I in those metersheds.

5.4 What is being done to address infiltration/inflow in your collection system?

MMSD continues sewer rehab through Operation and Maintenance, and Capital programs. MMSD is continuing to work with satellite municipalities to reduce inflow and infiltration with the wet weather peak flow management program. Throughout 2024 the District collected data from 191 permanent meters and 200 portable meters and also 137 surcharge level indicators in strategically selected sanitary sewers within its service area to more accurately measure wastewater flows under both dry and wet weather conditions. Measured peak flows at the 127 permanent monitoring locations included in the Wet Weather Peak Flow Management Program are compared to the allowable peak flows listed in Chapter 3 of the District rules. Action will be taken for any metersheds that are identified as exceeding the allowable peak flows. MMSD implemented the Private Property Inflow and Infiltration (PPI/I) Reduction Program in 2011 to support municipal work in reducing I/I from local private property sources. Twenty-seven of the twenty-four member municipalities have PPI/I reduction projects completed or in progress in the 15th year of the PPI/I Program. MMSD completed and implemented the MMSD CMOM program in 2007 and has continued implementation annually. MMSD completed and implemented the MMSD CMOM program in 2007 and has continued implementation annually. In addition, all municipalities have developed and implemented CMOM and Asset Management programs. MMSD also has a Green Infrastructure (GI) initiative that is aimed at capturing 740 million gallons of water every time it rains by the year 2035. In 2024 MMSD had eight active green infrastructure programs under this initiative: 1. Green Infrastructure Partnership Program, 2. Fresh Coast Green Solutions, 3. Green Schools Milwaukee, 4. Neighborhood Green Infrastructure Outreach, 5. Reforestation and Wetland Restoration, 6. Green Highways, 7. Community Based Green Infrastructure, and 8. Fresh Coast Works Ambassadors. In 2024, the District's GI programs netted 6.16 million gallons of stormwater capture. The Fresh Coast Resource Center run by District staff conducted 22 workshops on rain barrel and rain garden installation that had 2167 attendees. In 2024, MMSD completed 18 projects through the new Reforestation and Wetland Restoration Program, through these projects more than 26,000 trees were planted and 45 acres of wetlands were restored or enhanced. The total gallons of green infrastructure capacity in the District's Regional Database was 154.1 million gallons, 66.2 million gallons that were directly funded by MMSD (2004-2024).

	sistently meet CSO Performance Standards for water quality based
The District Continues to Con	sistently meet CSO renormance Standards for water quality based

The District continues to consistently meet CSO Performance Standards for water quality based requirements as outlined in our permit. As stated in the current WPDES Permit (Section 4.3.3(10)): "The permittee has submitted the documentation that demonstrated implementation of each of the nine minimum controls in accordance with Section IIB of the U.S. EPA CSO Control Policy. The permittee submitted this documentation to the Department as an element of its 2020 Facilities Plan, approved by the Department on December 26, 2007." Not content with just maintaining status quo, however, the District has a goal of 0 CSOs as targeted in our 2035 Vision Statement. The District's ten-year Long Range Financing Plan includes \$3.3 billion (\$2.0 billion in projects and \$1.3 billion in debt service) to maintain and improve the regional capital infrastructure that helps protect public health, homes, businesses and waterways. This includes spending to fix private property sources of excess water that can overwhelm sanitary sewer systems. Having already committed \$5.7 billion for clean water infrastructure in previous years, MMSD's asset management is vital for optimizing reliability and performance of new and aging resources for our treatment plants, sewers, and flood management facilities.
